Security PricingPro Contract Pricing and Analysis Software Designed For Security Companies of All Sizes!

Quickly becoming the industry standard!

Have you ever wished you could dramatically reduce the time it takes to develop pricing for a new bid or proposal? Would like to be able to delegate the task to one of your staff members with the confidence that the pricing would be accurate based on your goals?

WITH SECURITYPRICING PRO

You can enter your assumptions, choose your profit target and let Security PricingPro compute the correct billing rates. Know the precise profit on every contract you have! Successful security companies build their billing rates from the bottom up with precise detail regardless of how complex the contract may be! Whether your profit target is based on \$'s per hour, or a % of revenue, Security PricingPro will automatically determine the proper bill rates. No more trial and error!

PRODUCT DESCRIPTION

Developed by security industry professionals Security PricingPro allows you to accurately price even the most complicated contract in minutes. Print or export professional price analysis reports and graphs to include in your proposal or rate increase request.
